

Setup New Laboratory Codes in Medical Director 2 and 3

If the Laboratory Code does not appear in MD, it can be added manually by:

1. In MD with an MD administrator password (usually the doctors password) go to **Main Screen** → **Options** → **Lists tab**.
2. Select Pathology Requests
3. Enter the New Lab Code in the box beside to Add and then Click Add

The screenshot shows the "Options" dialog box with the "Lists" tab selected. The dialog has a title bar with "Options" and "Help" and "X" buttons. Below the title bar are several tabs: Examination, Drug Support, Devices, PKI, RSD, General, Prescribing, Progress notes, Practice, Lists, Investigations, Network, Links, Prompts, Clinical, and History. The "Lists" tab is active, showing a "List to edit" section with radio buttons for "Dose", "Frequency", "Instructions", "Pathology requests" (which is selected), "Radiology requests", and "Address book categories". To the right is a "User defined items currently in list" section with an empty list box. Below the list box is a text input field containing "EGP" and an "Add" button. Below that is a "Delete highlighted item" button. At the bottom of the dialog, there is a checked checkbox for "Auto-capitalise names" and "Save" and "Cancel" buttons.

4. The new test code will appear in the "User defined items" box.

- Next time the Dr. Print a Pathology Request the Test Code will visible in the "Available Tests" as shown below.

Pathology Request Portal - . Ace Asia Pacific P/L Help X

Date: 30/09/2008

Provider: MEDLAB
